ISLESBORO SCHOOL COMMITTEE RESOLUTION ON AFFORDABLE HOUSING

The Islesboro School Committee believes that affordable housing, for both families and school staff members, represents an issue of unique importance for the long-term sustainability of the school and the island community itself. The School Committee applauds efforts on the part of the Town of Islesboro to identify and support the concept of Town Centers and other such initiatives that will support the development of higher density, more affordable options for housing. The School Committee stands ready to provide information, data, and perspectives from families and staff members that might cast a sharper light on this issue and support the efforts of the Town. Moreover, the School Committee will continue to position the school as a leader and a model for how island schools can provide an excellent education for both island residents and magnet families.
